# THUMB COAST STORM DRAIN ART PROJECT

[scriver.org/StormDrainProject](http://scriver.org/StormDrainProject)

Contact: [Lydia@scriver.org](mailto:Lydia@scriver.org)

The Thumb Coast Storm Drain Art Project began in 2022 with 24 murals in Port Huron, St. Clair, and Marine City by artists of all skill levels and ages. Murals painted on sidewalks and streets bring awareness to the connectivity between storm drains and our rivers. A painted storm drain reminds us that what goes into the drain ends up in our rivers untreated.

Sponsor a storm drain mural at your school to provide students with a unique creative opportunity, as well as a new way to engage students in understanding the storm drain-river connection. Students can design and paint a mural while learning what they can do to protect their environment.
